Self-power your home and business Reduce energy bills and CO₂ emissions

Mole Energy offers award-winning, cost-effective, **bespoke solar PV and battery storage installations for any site**, however complex, whatever the challenge. We're here to help homeowners and businesses become self-sufficient, save money and reduce CO₂ emissions. Being part of Mole Valley Farmers, established in 1960, means you can expect a friendly face, expert advice and fair pricing.

Integrity first

We put people before profit and will only offer you products and services that are right for you and your own unique requirements.

Total transparency

Our specialist team will keep you informed, every step of the way, so you'll be in control at all times and know what we're doing and why.

Solar specialists

Our reputation rests on the years of engineering and electrical expertise that we bring to each solar project.

Attention to detail

We take the time to understand you and your project, ensuring that our solutions are bespoke, flexible and cost-effective.

Zero-rated VAT on home battery storage, as well as solar!

"The installation went very smoothly. The team was very professional; the panels were fitted in a single day, with the aid of scaffolding provided by a company recommended by Mole Energy. At the same time, an inverter and control unit were fitted on the side of the house next to the meter, ready for the battery, which was fitted to the same high standard as the rest of the work. We were then off-grid and on-charge from the solar panels - with electricity to spare.

We are very satisfied with our installation, in terms of the performance of the components recommended by Mole Energy, the service provided by their office staff and by the quality and professionalism of their technicians."

Ian
Homeowner

"Solar energy has been an absolute no-brainer for us. **We have cut our energy bills by approximately £8,000 in a year.**

That's £200,000 over 25 years based on past prices! It makes total economic sense. If I were asked whether I would use Mole Energy again, I would have no hesitation in saying 'yes'. They made installing panels easy; making all the arrangements, keeping us up-to-date, organising all the paperwork and seeing the work through to completion. Throughout, the service has been second to none and we have also got to know the team personally. They are so easy to deal with; down to earth and approachable. Not only that, but we have reduced our CO₂ emissions by nearly 32,000kg in the same time period!"
